

# BROADCAST VIDEO

Shaw Business Solutions' Broadcast Video service provides high-quality video transportation for companies who require reliable transmission of broadcast quality video in real time. Configured for uni-directional or bi-directional transmission, we can support both national and regional broadcasters, production and post-production facilities, special event providers and enterprises through our international network. This means we can ensure exceptional customer service with a single point of contact and a single invoice. Due to our extensive fiber footprint, we reach major North American metro markets including Seattle, Vancouver, Victoria, Calgary, Edmonton, Chicago, New York, Toronto, plus hundreds of remote locations coast-to-coast. Plus, we offer NTSC, SDI or DVB-ASI signals, so we can broadcast your video regardless of desired format.

## **BROADCAST VIDEO FEATURES INCLUDE:**

- Fiber-based service enabling a high-quality live output of images and studio quality sound
- Carrier-class video equipment complies with stringent guidelines set out by international video governing bodies
- Uni- or bi-directional transmissions available
- Transport video over our fully redundant self-healing MPLS and SONET backbone
- Multiple digital or analog interface options, such as SDI, DVB-ASI, analog composite or IP (Ethernet)
- Support 4:2:2 and 4:2:0 colour resolution standards in a variety of bandwidth increments
- Support embedded audio or separate AES/EBU audio streams
- Experienced operations personnel monitor the network and provide 24/7/365 technical support
- Service Level Agreements
- Special event/short term contracts available
